1. Overview

Unicorn AI:
In the ever-evolving world of Web3, Charlie Unicorn AI introduces The Entertainment Ecosystem that integrates Artificial Intelligence, DeFi, Game-Fi. Designed for full transparency and regulatory compliance within the European Union restrictions.

Charlie Unicorn AI plans to obtain a CASP license to ensure full compliance with MiCA regulations regarding crypto-asset service providers."

Key Highlights:

- MiCA-compliant and fully regulated

- AI-driven market analysis and automated DeFi investment strategies

- Multichain support including Ethereum, Base, BNB, Polygon, Solana, and TON

- P2E Airdrop Game - https://t.me/CharliegameBot

- Integrated staking after the presale

- Ongoing development of AI powered dating app and Full PC Game Based on Unreal Engine 5

- Supporting young talents!

2.Tokenomics

Token Contract: 0xb9c337151178cf0eC9a6B13a121C661065a80f36

Please note that you should not send any funds to that address. It may result the permanent loss of the tokens.

Token Name: CHARLIE

Token Decimals:18

Token Symbol: $CHRLE

Supply:100 BILLION

Network: BNB

Category	Allocation (%)	Details
Presale	60%	Public token sale – offering early adopters additional staking incentives (see Section 5)
Airdrops	15%	Gradually distributed to fuel ecosystem growth
Reserve Fund	5%	Allocated for ecosystem security and strategic initiatives
Liquidity	15%	Supports listings on DEX and CEX
Team	5%	100 % locked for 365 days

The liquidity pool will be locked for one year and then gradually burned over the next years.

This tokenomics model is designed to ensure long-term stability, incentivize early participation, and maintain full compliance with EU regulations.

Token $CHRLE is classified as a utility token in accordance with MiCA and does not constitute an e-money token (EMT) or an asset-referenced token (ART)

3. Presale Token Sale Breakdown

Our presale is split into six dynamic phases, starting with a base price of $0.0002 per token. Here's the rundown:

- **Phase 1:**
    - **Tokens Sold:** 10 billion
    - **Price per Token:** $0.00020
    - **Total Raised:** $2,000,000

- **Phase 2:**
    - **Tokens Sold:** 10 billion
    - **Price per Token:** $0.00024
    - **Total Raised:** $2,400,000
      (Reflecting a 20% price increase)

- **Phase 3:**
    - **Tokens Sold:** 10 billion
    - **Price per Token:** $0.00028
    - **Total Raised:** $2,880,000
      (A 16% bump from the previous phase)

- **Phase 4:**
    - **Tokens Sold:** 10 billion
    - **Price per Token:** $0.000345
    - **Total Raised:** $3,450,000
      (A robust 23% price jump)

- **Phase 5:**
    - **Tokens Sold:** 10 billion
    - **Price per Token:** $0.000414
    - **Total Raised:** $4,140,000
      (A further 20% increase)

- **Phase 6:**
    - **Tokens Sold:** 10 billion
    - **Price per Token:** $0.000496
    - **Total Raised:** $4,960,000
      (Final phase with a 10% increase)

Total Raised Across All Phases: $19,830,000

4. Overall Token Distribution

The $CHRLE token is allocated through three key channels to ensure broad participation and market momentum:

- **Presale:**
  - During the presale, the general public can grab $CHRLE tokens at a significant discount.
  - **Starting Price:** $0.0002 per token.
  - **Allocation:** 60% of the total token supply is sold during this phase.
  - **Duration:** The presale is slated to last approximately until 30th June 2025

- **Public Listing:**
  - The initial public listing kicks off on Pancakeswap, where additional tokens and BNB are added to the liquidity pool.
  - Tokens will then be listed on both decentralized (DEX) exchanges at a starting price of $0.000496 per token.
  - Early presale participants have the potential to realize up to more than 100 % gain.

Buy tax	0 %
Sell tax	3 % (1% team, 1% community airdrop, 1% liquidity)

- **Community Marketing:**
  - The remaining 5% of tokens will be distributed through community marketing initiatives.
  - The community will have a say in how these tokens are allocated, furthering our goal of achieving mass adoption.

5. Staking & Extended APY after the Presale

✓ **Staking development – completed**

Innovative Staking Mechanism:
To reward early investors and presale participants, Charlie Unicorn AI introduces a staking feature that allows users to extend their Annual Percentage Yield (APY) based on the length of their staking period.

APY	5%	8%	10%	12%	15%
Earn	CHRLE	CHRLE	CHRLE	CHRLE	CHRLE
Deposit Fee	0 %	0 %	0 %	0 %	0 %
Lockup	30 days	60 days	90 days	120 days	180 days
Extending Additional APY Reward	Yes	Yes	Yes	Yes	Yes

How It Works:

- **Extended APY:** The longer the staking period chosen by the investor, the higher the APY on their staked tokens, offering an attractive yield boost during the early phase of the project.

- **Benefits:**

    o Enhances token value through effective supply reduction

    o Encourages long-term engagement and loyalty within the community

    o Supports overall ecosystem stability and growth

The staking system is planned to be fully integrated with the DAO, allowing the community to provide feedback and influence future yield parameters.

6. P2E Game – Charlie Game

https://t.me/CharliegameBot

The Charlie TG Game is an innovative crypto gameplay where players can collect pNFT cards, thereby increasing their farming rate.

The more cards are bought, the faster the **rate of reward** generation increases, which encourages active participation in the game.

At the end of the presale, there will be an airdrop of $CHRLE tokens, which will be distributed among participants according to their commitment and the level of cards they hold.

This is an excellent opportunity for NFT and DeFi fans to get valuable assets in the modern gaming ecosystem!

The pinnacle of the P2E game's development will be a **PC game built on Unreal Engine 5**, where players can use **$CHRLE tokens** for various in-game transactions.

Token Utility Mechanics:

💎 **Marketplace Transactions** – Buy, sell, and trade Unicorns, accessories, and power-ups using $CHRLE.

🎮 **Entry Fees & Tournaments** – Participate in races, training events, and high-stakes competitions by wagering tokens for greater rewards.

🏆 **Betting System** – Place bets on races using $CHRLE and win based on race outcomes.

🔧 **Upgrades & Customization** – Enhance Unicorns with unique skins, skills, and equipment purchased with tokens.

🧾 **Staking & Yield Farming** – Stake $CHRLE to earn passive rewards, unlock premium features, or gain access to exclusive events.

🏯 **Land & Facility Ownership** – Purchase and manage virtual land or training centers within the game's ecosystem.

By integrating these mechanics, the **Charlie Unicorn AI project** will ensure a **sustainable and engaging economy**, making $CHRLE a core asset of the game's ecosystem.

---

7. Technology

Advanced Technological Architecture:

- **Multichain Compatibility:** The $CHRLE token operates seamlessly across multiple blockchains (Ethereum, Base, BNB, Polygon, Solana, TON), ensuring fast and cost-effective transactions.

- **Long-term development plan:**

    -creating own blockchain technology.

    -creating Unreal Engine 5 based PC game

8. Security & Trust

- **Smart Contract Security:** We conduct regular third-party audits of our $CHRLE token smart contracts to quickly spot and fix any vulnerabilities.

- **Data Protection:** All information—including user and trading data—is safeguarded with cutting-edge encryption technology.

- **Blockchain Transparency:** Every transaction is permanently logged on the blockchain for full transparency.

- **Community Engagement:** Our team keeps the community in the loop with consistent updates, ensuring clear and open communication on all operations and developments.

9. Roadmap

Phase 1 – Ecosystem Launch (Q1–Q3 2025):

- Achieve full regulatory compliance (MiCA, AML/KYC)

- Launch the public presale with integrated staking rewards

- Establish strategic partnerships and complete smart contract audits

- Staking with possibility of extending for additional APYs (after the presale)

- P2E Game

- NFT Minting Page

- TON Bridge

- Image Generator

Phase 2 – Scaling (Q3–Q4 2025):

- List $CHRLE on DEX (Pancakeswap) and CEX (crypto.com)

- Expand staking features and implement DAO governance functionalities

- Roll out a community-driven marketing campaign to support strategic partnership

- Develop AI powered dating app

Phase 3 – Global Expansion (2026+):

- Move towards complete decentralization through full DAO governance

- Launch full PC game based on Unreal Engine 5

- Tier 2 and Tier 1 CEXes

- Launch the test-net and integrate additional technological innovations

- Expand internationally by securing new licensing and regulatory approvals

10. Marketing

- ✓ Coinsniper
- ✓ Paal AI
- ✓ Crypto.com
- ✓ Mymemes.ai
- ✓ Coingecko
- ✓ Socials: X, FB, TikTok, Youtube, Telegram KOLs

11. Supporting young talents!

At **Charlie Unicorn AI**, we are committed to supporting the development of young talents.

We have a **dedicated program** designed to nurture and empower the next generation, providing them with opportunities to grow, learn and achieve their dreams.

*Charlie Unicorn AI project is proud to support young Polish 11-year-old future UFC fighter **Tyson Kwiatkowski!***

Fighter MMA BJJ MUAY THAI
WORLD CHAMPION PAN KIDS 2023 🏅
NAGA 4x GOLD BELT 2023
EUROPEAN CHAMPIONSHIP GYM

With dedication and talent beyond his years, Tyson embodies the spirit of perseverance and excellence that aligns with our mission.

https://www.instagram.com/tysonpolishchampion/

We are in talks with other young athletes as a part of our supporting and marketing plan, which aims to expand globally over time as our project grows. Our vision is to create a worldwide network that supports and nurtures young talents across various disciplines.

12. Get Involved

Join the Charlie Unicorn AI revolution:

- **Official Website:** charlieunicornai.eu

- **Community:** Follow our social media channels, use Charlie Image Generator for free! Participate in DAO since Q3 2025

- **Presale:** Secure your early position by joining the presale

- **Staking:** Get your $CHRLE right now to participate in extended APY staking program after the presale (https://chalie-blockchain.vercel.app/)

- **Contact:** For further information, email team@charlieunicorn.ai

Embrace the future of a regulated Web3 ecosystem where innovation, transparency, and community empowerment drive sustainable growth.

13. AML/KYC policy

Charlie Unicorn AI implements fundamental AML (Anti-Money Laundering) and KYC (Know Your Customer) procedures in compliance with MiCA regulations.

KYC (User Verification):

Basic verification is required by providing:
- ✅ **Crypto wallet address**
- ✅ **Full name**

Additional document verification may be required for selected users based on risk analysis.

AML (Transaction Monitoring):

- Screening crypto wallets for sanctions and illicit sources.

- Reporting suspicious transactions exceeding €10,000 in accordance with EU regulations.

- Implementing core anti-money laundering mechanisms aligned with MiCA's minimum requirements.

User data and wallet addresses are processed strictly for compliance with EU regulations.

14.Customer protection

Charlie Unicorn AI provides basic mechanisms to protect users according to MiCA:
Complaints and contact:
Users can report complaints via e-mail: team@charlieunicornai.eu
All applications are processed within 14 working days.
Refunds and opt-out of token sale:
Tokens purchased in the presale are non-refundable, in accordance with the rules for the sale of cryptoassets.
Users accept the terms of purchase at the time of transaction.
Dispute resolution:
In case of disputes, users can resort to an out-of-court solution by contacting the dedicated support team.
All legal issues are subject to the jurisdiction of Polish law and EU regulations.
 Users are required to read the terms of use of the ecosystem before making a transaction.

15. Investment Risk

Investing in crypto assets carries high risks and may result in the loss of some or all of your invested funds. Charlie Unicorn AI implements risk mitigation measures to minimize the following threats:

1. Price Volatility Risk

Mitigation: Staking and liquidity mechanisms designed to enhance price stability.

2. Regulatory Risk

Mitigation: Registered operations within the EU, full AML/KYC compliance, continuous regulatory monitoring, and adaptation to new legal requirements.

3. Technological Risk

Mitigation: Smart contract audit conducted by the reputable firm Solidproof.

4. Liquidity Risk

Mitigation: Strong initial liquidity on both DEX and CEX, with sufficient reserves secured in the liquidity fund.

5. Market Risk

Mitigation: Strategic partnerships, aggressive marketing campaigns, and a strong value proposition within the GameFi/DeFi ecosystem.

6. Operational Risk

Mitigation: Decentralized governance through a hybrid DAO (starting Q3 2025), transparent decision-making, and financial reporting.
